Sir:

Dr. Joshua Lederberg, now President of The Rockefeller University, made some important general societal comments today regarding the artificial-heart experimental effort now underway at the University of Utah Medical Center.

When I said that the rest of us in lay society might benefit by his insights, and that I hoped he would set down his observations in a public forum, he referred me to a column he wrote for you more than a decade-and-a-half ago -- saying "It's all there."

Enclosed is a copy of Dr. Lederberg's July 24, 1966 column in the Washington Post. You might wish to republish it.

Very truly yours,

Milton R. Wessel
